i.c.e. Sliding Patio Door System

Achieve the beauty of natural timber and the clarity of glass while combining the space saving efficiency of a Sliding Door System. A Choice of two, three, four and six door unit combinations that accommodate almost any variety of design application.

1
A U-shaped top track system combines draft strips for protection from the elements and prevents rattling

2
An ergonomically designed key lockable door furniture that passes between the sliding doors

3
Combination timber and aluminium sills provide self draining capability while keeping a natural timber look.

4
Double axle roller carriers allow smooth sliding and easy adjustment.
